

Addendum to Application Physical Therapy and Case Management

Littleton Regional Healthcare has Inpatient Physical and Occupational Therapy services available 6 days a week with Sunday availability if necessary. We also have speech therapy services available based on order/request.

We have inpatient and outpatient Case Management services who coordinate care for patients. This includes coordinating discharge services, transfer and outpatient rehab services or transfer to a short term rehab. Our mechanism for determining transfer to freestanding rehabilitation is through PT/OT evaluation and physician order. If it is determined by the multidisciplinary team and the patient and/or their family agree Case Management will make referrals and coordinate the process.
