

Fire Prevention and Public Education

Objectives: (NFPA 1001 5.5.2(B) and 5.5.1(B))

- Ability to complete forms
- Ability to recognize hazards
- Ability to match findings to preapproved recommendations
- Ability to effectively communicate findings to occupants or referrals
- Ability to document presentations
- Ability to use prepared materials

Equipment:

- Fire Prevention and public education pamphlets
- Home safety

Instructors:

One Lead; Two instructor

Support Staff:

- None

Instructions:

During orientation students will assemble themselves into four teams of six. Each team will be assigned a topic (EDITH; Stop, drop, and roll; Smoke detectors in the home; Carbon Monoxide Detector in the home). Each team will prepare their topic and present that topic at a designated time.

Public Education

Each team will prepare a maximum 10 minute presentation on their topic. Each team will provide a documented outline on their presentation prior to presenting. The document must include, the name of the topic, date, who the team members are, list of reference used and what each team member contributed. An example of this document can be found in the online folder for Fire Prevention and Public Education.

Instructors and peers will evaluate each team's presentations using the matrix below. The idea is for the team to be able to deliver a Public Safety message to small groups of community members or school age children.

Home Fire Safety Survey

Each student will conduct a home fire safety survey on their residents. This is a project students will complete and upload to the online platform. All of the information and the document can be found in the online platform.

FFII-PublicSafety -1	Public Safety Presentation: _____ (Topic)	
NFPA 1001- 2019; 5.5.2	CANDIDATE: _____	Evaluator: _____ Date: _____ Total Time: _____ Status: PASS / FAIL (circle one)

	3 - GOOD	2 - FAIR	0 – Misses the Mark	POINTS
Content				
Speaking Skills				
Length of Presentation	With-in 2 Minutes +/-	With-in 3 Minutes +/-	10 Minutes Stopped by the Evaluator
